# Benchtop Ball Mill LD-LBBM-B10

## Overview

Benchtop Ball Mill is an effective tool in grinding of materials into ultra-fine powder, equipped with two working positions. It can mill materials from 10 mm to 200-1000 mesh. Uniformity is achieved by the effect of grinding media and friction. It is easy to operate. Mostly used in scientific research, production, magnetic material, biological medicine, etc.

## Features:

- Easy to operate
- Adjustable timer range
- Highly uniform particle size of materials
- Variety of feed materials can be processed simultaneously
- Movable axis allows applying of different jars

## Applications:

Widely used for milling process in the industries of electronic material, magnetic material, biological medicine, ceramic glaze, metal powder, non-metallic minerals, new materials, and research institutes.

## Specifications:

<b>Weight</b>	59 Kgs
<b>Dimension</b>	890 x 440 x 685 mm
<b>Power supply</b>	0.75 kW/220 V
<b>Length of roller</b>	609 mm
<b>Max load per Jar</b>	35 Kg
<b>Working stations</b>	2
<b>Rotating speed range</b>	50-410 RPM
<b>Sample capacity per time</b>	3.3 L
