Water Content Tester LD-LWT-A11

Overview

LWT-A11 is fabricated to determine water content in petroleum products and grease according to ASTM D95 "Test Methods for Water Content of Petroleum Products" and ASTM D7303 "Test Methods for Water Content in the Lubricating grease".

Features:

- Bidirectional Silicon Controlled Rectifier
- Ambient Temperature is less than 35°C
- Relative Humidity is less than 85%
- Less power consumption

Applications:

It is used to determine water content in crude oil, refined petroleum products, fuels, biofuels, lubricants, chemicals, and other products.

Specifications:

Dimensions	690 × 570 × 310mm
Power Supply	AC 220 V ± 10 % 50 Hz
Power Consumption	≤ 2200 W
Relative Humidity	≤ 85 %
Ambient Temperature	≤ 35 °C
Sample Determination	2 at once
Heating Power of Electric Furnace	1000 W × 2
