

Ductless Fumehood

LFH-A1 series

Ductless Fumehood LFH-A1 series

Ductless Fumehood LFH-A10:

Ductless Fumehood LFH-A10 is a microprocessor controlled ductless fumehood with built in centrifugal blower. It has maximum opening of 520 mm and 9 levels air speed exhaust blower. Equipped with LED and UV lamp for illumination and decontamination of working environment. Carbon and HEPA filter for air fume filtration. It is ideally used for effective working environment in microbiology, biology, biotechnology field centers.

Ductless Fumehood LFH-A11:

Ductless Fumehood LFH-A11 is a microprocessor controlled ductless fumehood with built in centrifugal blower. It has maximum opening of 520 mm and 9 levels air speed exhaust blower. Equipped with LED and UV lamp for illumination and decontamination of working environment. Carbon and HEPA filter for air fume filtration. It is ideally used for effective working environment in microbiology, biology, biotechnology field centers.

Ductless Fumehood LFH-A12:

Ductless Fumehood LFH-A12 is a microprocessor controlled ductless fumehood with built in centrifugal blower. It has maximum opening of 520 mm and 9 levels air speed exhaust blower. Equipped with LED and UV lamp for illumination and decontamination of working environment. Carbon and HEPA filter for air fume filtration. It is ideally used for effective working environment in microbiology, biology, biotechnology field centers.

Ductless Fumehood LFH-A13:

Ductless Fumehood LFH-A13 is a microprocessor controlled ductless fumehood with built in centrifugal blower. It has maximum opening of 520 mm and 9 levels air speed exhaust blower. Equipped with LED and UV lamp for illumination and decontamination of working environment. Carbon and HEPA filter for air fume filtration. It is ideally used for effective working environment in microbiology, biology, biotechnology field centers.

Ductless Fumehood LFH-A1 series

Features:

- Ductless type of fumehood
- Microprocessor control system
- Digital LED display
- LED lamp for illumination
- UV lamp for decontamination of working environment
- 9 level adjustable air speed exhaust blower
- Built-in centrifugal blower
- Motorized front glass window
- Carbon filter to remove toxic fumes
- Can be customize with HEPA filter
- Alarm function on filter reaching working time of 3500 hours
- Chemically resistant phenolic resin work table
- External material made up of cold rolled steel having anti-bacterial coating
- Air velocity memory function in case of power failure
- Backside air compensation avoiding turbulence in working area
- Transparent side glass windows providing effective visual appearance of inner side

Applications:

Ductless Fumehood is used for providing effective working environment for laboratory experiments in various fields of microbiology, chemical, biotechnology, research centers etc.
