Type II Water Purification System

Type II Water Purification System LTWP -A1 series is a 30 L / 80 L capacited modular design which meets the needs of basic laboratory water purifier. It provides Type II level water with consistency and reliability with a TOC level of < 20 ppb. Remove approximately 98% of inorganic ions and 99 % of all dissolved organic substances. These systems produce and reject water at the same time .Equipped with easy replaceable filters. It's designed to deliver compliant purified water with clear quality parameters and care free maintenance.
